1 Product End of Life List

The following list of products have reached end of life status. As medical technology advances, parts and software availability and upgrade capability diminish, Del Medical Inc. has undertaken a review of all the products we support and have determined we no longer adequately provide parts and technical support on several product types that have not been manufactured in some time. As a result, we will no longer be able to guarantee parts or support for the products on the list.

Del Medical Inc. will continue to supply parts and software remaining in our inventory or which are currently manufactured by one of our component suppliers. Technical service support will be limited to parts identification and providing schematics and diagrams for these products.

Del Medical Inc. offers a complete line of generators, tables, tube cranes, wallstands and digital systems to satisfy the requirements of the entire range of Medical imaging end users, from private physician practices to major hospital centers. Del Medical values your past support and looks forward to supplying your imaging equipment needs in the future. Please call us if you have any questions about this end of life list.
